

# Safety Data Sheet according to (EC) No 1907/2006 as amended

Page 1 of 27

## TEROSON PU 8519 PRIMER

SDS No. : 284600 V020.1 Revision: 20.12.2023 printing date: 27.12.2023 Replaces version from: 22.09.2023

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### **1.1. Product identifier** TEROSON PU 8519 PRIMER

#### **1.2. Relevant identified uses of the substance or mixture and uses advised against** Intended use:

Direct Glazing Adhesive

# 1.3. Details of the supplier of the safety data sheet

Henkel AG & Co. KGaA Henkelstr. 67 40589 Düsseldorf

Germany

Phone: +49 211 797 0

SDSinfo.Adhesive@henkel.com

For Safety Data Sheet updates please visit our website https://mysds.henkel.com/index.html#/appSelection or www.henkel-adhesives.com.

#### **1.4. Emergency telephone number**

The Henkel information service also provides an around-the-clock telephone service on phone no.+49-(0)211-797-3350 for exceptional cases.

## **SECTION 2: Hazards identification**

## 2.1. Classification of the substance or mixture

| Classification (CLP):                            |            |
|--|------------|
| Flammable liquids                                | Category 2 |
| H225 Highly flammable liquid and vapour.         |            |
| Serious eye irritation                           | Category 2 |
| H319 Causes serious eye irritation.              |            |
| Specific target organ toxicity - single exposure | Category 3 |
| H336 May cause drowsiness or dizziness.          |            |
| Target organ: Central nervous system             |            |

2.2. Label elements

Label elements (CLP):

Hazard pictogram:

Contains

Butanone

|  | Ethyl acetate  |
|--|--|
| Signal word:                           | Danger   |
| Hazard statement:                      | H225 Highly flammable liquid and vapour.<br>H319 Causes serious eye irritation.<br>H336 May cause drowsiness or dizziness.   |
| Supplemental information               | EUH066 Repeated exposure may cause skin dryness or cracking.<br>Contains isocyanates. May produce an allergic reaction.  |
| Precautionary statement:<br>Prevention | <ul><li>P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.</li><li>No smoking.</li><li>P261 Avoid breathing vapors.</li><li>P280 Wear protective gloves/eye protection.</li></ul> |
| Precautionary statement:<br>Response   | P370+P378 In case of fire: Use CO2, dry chemical, or foam for extinction.  |

#### 2.3. Other hazards

Solvents contained in the product evaporate during processing and their vapors can form explosive/highly inflammable air/vapor mixtures.

The solvent vapors are heavier than air and may collect in high concentrations at floor level.

# Following substances are present in a concentration $\geq$ the concentration limit for depiction in Section 3 and fulfill the criteria for PBT/vPvB, or were identified as endocrine disruptor (ED):

This mixture does not contain any substances in a concentration  $\geq$  the concentration limit for depiction in Section 3 that are assessed to be a PBT, vPvB or ED.

# **SECTION 3: Composition/information on ingredients**

3.2. Mixtures

## Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components<br>CAS-No.<br>EC Number<br>REACH-Reg No.                           | Concentration | Classification   | Specific Conc. Limits, M-<br>factors and ATEs   | Add.<br>Information |

If no ATE values are displayed, please refer to LD/LC50 values in Section 11. For full text of the H - statements and other abbreviations see section 16 "Other information".

# **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

Inhalation:

Move to fresh air, consult doctor if complaint persists.

Skin contact:

Rinse with running water and soap. Apply replenishing cream. Change all contaminated clothing. If necessary, see a dermatologist.

#### Eye contact:

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Ingestion:

Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

## 4.2. Most important symptoms and effects, both acute and delayed

EYE: Irritation, conjunctivitis.

An allergic reaction cannot be excluded after repeated skin contact.

Repeated exposure may cause skin dryness or cracking.

Vapors may cause drowsiness and dizziness.

# 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

## **SECTION 5: Firefighting measures**

5.1. Extinguishing media Suitable extinguishing media: Carbon dioxide, foam, powder

Extinguishing media which must not be used for safety reasons: Water jet (solvent-containing product).

#### 5.2. Special hazards arising from the substance or mixture

In case of fire toxic gases can be released.

#### 5.3. Advice for firefighters

Wear self-contained breathing apparatus. Wear protective equipment.

#### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Wear protective equipment. Avoid contact with skin and eyes. Keep unprotected persons away. Danger of slipping on spilled product.

#### **6.2.** Environmental precautions

Do not empty into drains / surface water / ground water.

#### 6.3. Methods and material for containment and cleaning up

Remove with liquid-absorbing material (sand, peat, sawdust). Dispose of contaminated material as waste according to Section 13.

# 6.4. Reference to other sections

See advice in section 8

# **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

Avoid open flames and sources of ignition. Use explosion proof electric equipment. Use only non-sparking tools. Ground/bond container and receiving equipment. Take precautionary measures against static discharge.

## Hygiene measures:

Wash hands before work breaks and after finishing work. Do not eat, drink or smoke while working.

## 7.2. Conditions for safe storage, including any incompatibilities

Ensure good ventilation/extraction. Storage at 5 to 25°C is recommended. Keep container in a well ventilated place.

# 7.3. Specific end use(s)

Direct Glazing Adhesive

# SECTION 8: Exposure controls/personal protection

# 8.1. Control parameters

# **Occupational Exposure Limits**

Valid for

Germany

| 78-93-3                         |            |            | shift.                | -      |                |        |             |
| [2-Butanone; Methylethylketone] |            |            |                       |        |                |        |             |

#### 8.2. Exposure controls:

Engineering controls: Use only in well ventilated areas.

Respiratory protection:

In case of aerosol formation, we recommend wearing of appropriate respiratory protection equipment with ABEK P2 filter (EN 14387).

This recommendation should be matched to local conditions.

Hand protection:

Chemical-resistant protective gloves (EN 374). Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374): Isobutylene-isoprene rubber (IIR; >= 0.7 mm thickness) Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374): Isobutylene-isoprene rubber (IIR; >= 0.7 mm thickness) This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection: Goggles which can be tightly sealed. Protective eye equipment should conform to EN166.

Skin protection: Wear protective equipment. Protective clothing that covers arms and legs. Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

Use only personal protection that's CE-labelled according to Directive 89/686/EEC (Europe) or to Regulation No. 819 of 19 August 1994 (Norway), or equivalent.

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

#### **SECTION 9: Physical and chemical properties**

## 9.1. Information on basic physical and chemical properties

| The more than the subic physical and chemic | ai properties   |
|---|---|
| Delivery form                               | liquid  |

Relative vapour density: Particle characteristics Not applicable Product is a liquid

# 9.2. Other information

Other information not applicable for this product

# **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

Reaction with water, alcohols, amines. Reacts with water: Pressure built up in closed vessel (CO2). Oxidizers.

#### 10.2. Chemical stability

Stable under recommended storage conditions.

#### 10.3. Possibility of hazardous reactions

See section reactivity

**10.4. Conditions to avoid** Humidity Heat, flames, sparks and other sources of ignition.

## **10.5. Incompatible materials**

See section reactivity.

## 10.6. Hazardous decomposition products

At higher temperatures isocyanate may be released. Carbon dioxide is generated under contact with moisture, leading to pressure in the cans. Danger of cans bursting!

# **SECTION 11: Toxicological information**

### General toxicological information:

An allergic reaction cannot be excluded after repeated skin contact.

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

## Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.                                | Value                                  | Value         | Species | Method  |

## Aspiration hazard:

The mixture is classified based on Viscosity data.

| Hazardous substances<br>CAS-No. | Viscosity (kinematic)<br>Value | Temperature | Method              | Remarks |
|---------------------------------|--------------------------------|-------------|---------------------|---------|
| Butanone<br>78-93-3             | 0,51 mm2/s                     | 20 °C       | ASTM Standard D7042 |         |

## 11.2 Information on other hazards

not applicable

# **SECTION 12: Ecological information**

## General ecological information:

Do not empty into drains, soil or bodies of water.

## 12.1. Toxicity

## Toxicity (Fish):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances  | Value | Value                          | Exposure time | Species  | Method   |
|---|-------|--------------------------------|---------------|--|--|
| CAS-No.   | type  |                                |               |  |  |
| Butanone<br>78-93-3   | LC50  | 3.220 mg/l                     | 96 h          | Pimephales promelas                                | OECD Guideline 203 (Fish,<br>Acute Toxicity Test)        |
| Ethyl acetate<br>141-78-6                                     | LC50  | 220 mg/l                       | 96 h          | Pimephales promelas                                | other guideline:   |
| n-butyl acetate<br>123-86-4                                   | LC50  | 18 mg/l                        | 96 h          | Pimephales promelas                                | OECD Guideline 203 (Fish,<br>Acute Toxicity Test)        |

#### 12.5. Results of PBT and vPvB assessment

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances                      | PBT / vPvB   |
|---|--|
| CAS-No.                                   |  |
| Butanone                                  | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 78-93-3                                   | Bioaccumulative (vPvB) criteria.   |
| Ethyl acetate                             | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 141-78-6                                  | Bioaccumulative (vPvB) criteria.   |
| n-butyl acetate                           | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 123-86-4                                  | Bioaccumulative (vPvB) criteria.   |
| Phenol, 4-isocyanato-, phosphorothioat    | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 4151-51-3                                 | Bioaccumulative (vPvB) criteria.   |
| 1,3-Diisocyanatomethylbenzene homopolymer | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 9017-01-0                                 | Bioaccumulative (vPvB) criteria.   |
| Acrylic acid                              | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 79-10-7                                   | Bioaccumulative (vPvB) criteria.   |
| 4-isocyanatosulphonyltoluene              | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 4083-64-1                                 | Bioaccumulative (vPvB) criteria.   |

#### **12.6. Endocrine disrupting properties**

not applicable

#### 12.7. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

#### **13.1.** Waste treatment methods

Product disposal:

In consultation with the responsible local authority, must be subjected to special treatment.

Waste code 080409

Waste code

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you.

# **SECTION 14: Transport information**

| 14.1. | UN number or ID number |
|-------|------------------------|
| 14.1. | UN number of ID number |

| ADR  | 1139 |

#### **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text of all abbreviations indicated by codes in this safety data sheet are as follows: H225 Highly flammable liquid and vapour. H226 Flammable liquid and vapour. H302 Harmful if swallowed. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H400 Very toxic to aquatic life. H411 Toxic to aquatic life with long lasting effects.

| ED:         | Substance identified as having endocrine disrupting properties                           |
|-------------|--|
| EU OEL:     | Substance with a Union workplace exposure limit  |
| EU EXPLD 1: | Substance listed in Annex I, Reg (EC) No. 2019/1148                                      |
| EU EXPLD 2  | Substance listed in Annex II, Reg (EC) No. 2019/1148                                     |
| SVHC:       | Substance of very high concern (REACH Candidate List)                                    |
| PBT:        | Substance fulfilling persistent, bioaccumulative and toxic criteria                      |
| PBT/vPvB:   | Substance fulfilling persistent, bioaccumulative and toxic plus very persistent and very |
|             | bioaccumulative criteria   |
| vPvB:       | Substance fulfilling very persistent and very bioaccumulative criteria                   |

#### **Further information:**

This Safety Data Sheet has been produced for sales from Henkel to parties purchasing from Henkel, is based on Regulation (EC) No 1907/2006 and provides information in accordance with applicable regulations of the European Union only. In that respect, no statement, warranty or representation of any kind is given as to compliance with any statutory laws or regulations of any other jurisdiction or territory other than the European Union. When exporting to territories other than the European Union, please consult with the respective Safety Data Sheet of the concerned territory to ensure compliance or liaise with Henkel's Product Safety and Regulatory Affairs Department (SDSinfo.Adhesive@henkel.com) prior to export to other territories than the European Union.

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

#### Dear Customer,

Henkel is committed to creating a sustainable future by promoting opportunities along the entire value chain. If you would like to contribute by switching from a paper to the electronic version of SDS, please contact the local Customer Service representative. We recommend to use a non-personal email address (e.g. SDS@your\_company.com).

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
